AHMAD ALI RABANI

Islamabad, Pakistan • +92 3040180743 • ahmadalirabani07@gmail.com

PROFESSIONAL SUMMARY

Results-driven Frontend React Developer with over 2.5 years of hands-on experience building scalable, high-performance enterprise web applications. Proven expertise in React.js, TypeScript, Next.js, and modern UI libraries including Ant Design and Tailwind CSS. Currently contributing to Sianty GMS, a large-scale multi-panel Garage Management System, delivering complex features such as barcode scanner integration, VIN decoding with OCR, real-time vehicle tracking, and dynamic inspection modules. Adept at translating business requirements into clean, maintainable code, collaborating across cross-functional teams, and continuously adopting best practices in modern frontend development.

PROFESSIONAL EXPERIENCE

Enroute Technologies | **Frontend React Developer** | *June 2024 – Present*

Project: Sianty GMS — Enterprise Garage Management System

- Engineered and maintained multiple panels of Sianty GMS, a comprehensive enterprise-grade Garage Management System, using React, TypeScript, Ant Design, Tailwind CSS, React Query, and Vite.
- Developed an intelligent VIN (Vehicle Identification Number) decoder feature integrating Tesseract.js OCR library to extract VIN numbers directly from user-uploaded vehicle images, automatically populating the VIN input field; implemented Vincario third-party API integration to fetch comprehensive vehicle data upon VIN submission, dynamically populating multiple form fields including vehicle make, model, year, and specifications.
- Implemented a camera-based barcode scanner feature using the ZXing library, enabling real-time serial number detection for parts inventory with seamless API integration.
- Developed a complex technician timer component (ToggleJob/JobCardStart) featuring a precise state machine logic for elapsed time tracking using timestamps rather than counters.
- Redesigned the vehicle registration workflow from a multi-step wizard to a single-page accordion layout, significantly improving user experience and form completion efficiency.
- Built dynamic inspection forms with SVG and canvas-based vehicle damage marking, utilizing a custom viewBox coordinate system for accurate damage location capture.
- Integrated React Leaflet maps with real-time vehicle tracking capabilities, implementing smooth marker animation using requestAnimationFrame interpolation and OSRM road snapping.
- Developed a Spot Purchase profit margin feature and a comprehensive Next Visit Invoice print component with complex nested data rendering.
- Implemented React Query cache update patterns using setQueryData for optimistic UI updates, reducing unnecessary API calls and improving application responsiveness.
- Collaborated with backend teams on REST API integration using a custom Axios wrapper (fetchData), ensuring consistent error handling and authentication flows across all modules.

Precise Tech | **React Developer** | *Jan 2023 – June 2024*

- Collaborated in developing and maintaining responsive web applications using React.js, ensuring high performance, scalability, and cross-browser compatibility.
- Implemented reusable and modular UI components adhering to best practices, improving development efficiency and code maintainability across multiple projects.
- Worked closely with cross-functional teams to deliver features on time, debug critical issues, and optimize application performance under tight deadlines.
- Gained practical experience with state management libraries, REST API integration, and modern development tools including Next.js and TypeScript.

Elitx Technologies | **React Developer (Intern → Full-time)** | *August 2023 – Jan 2024*

- Completed an internship that transitioned into a full-time role, demonstrating exceptional performance and rapid skill acquisition in frontend development.
- Contributed to front-end development using React, JavaScript, TypeScript, and Next.js, designing and executing user interfaces that improved application performance and user experience.
- Cooperated with a dynamic development team to build and maintain scalable web applications, adhering to modern development standards and best practices.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

UI Libraries: Ant Design, Tailwind CSS, Bootstrap, Styled Components, Shadcn UI

State Management: React Query (TanStack), Redux, Context API

Backend Integration: REST APIs, Custom Axios Wrapper, WebSockets, Socket.io

Maps & Tracking: React Leaflet, Mapbox GL JS, OSRM Routing, Real-time GPS

Tools & Platforms: Git, GitHub, Vite, Firebase, Azure, Strapi CMS

Other: ZXing Barcode Scanner, Tesseract.js OCR, Vincario API, Canvas API, SVG Animation, PDF Generation

KEY PROJECTS

Sianty GMS — Garage Management System | Enroute Technologies

- Large-scale multi-panel enterprise application for complete garage operations management including job cards, vehicle inspections, parts inventory, invoicing, and customer management.
- Tech Stack: React, TypeScript, Ant Design, Tailwind CSS, React Query, Vite, React Leaflet, ZXing, Tesseract.js, Vincario API

Inventory Management System

- Developed a dynamic web application for real-time inventory tracking using Next.js SSR, Tailwind CSS, and Redux for centralized state management, ensuring scalability and modularity.

Sowa E-Commerce Platform

- Enhanced a dynamic responsive e-commerce platform using Next.js, Tailwind CSS, and Redux, implementing efficient cart management, user authentication, and product filtering with optimized API calls.

Dental Clinic Website Management & Optimization

- Managed and optimized a healthcare website interface, resolving critical UI issues and implementing performance optimization strategies that improved page load times and patient accessibility.
- Administered Strapi CMS platform to streamline content management workflows, enabling non-technical staff to efficiently update website content.

Mini Projects

- Real-time Weather App — React, Tailwind CSS, Weather API with location-based alerts and data visualization.
- Job Portal — React, React Bootstrap, Firebase with real-time job postings, applications, and user authentication.
- Nike Clone — React, Vite, Tailwind CSS replicating the Nike store UI with product listings and responsive design.
- Notes App — React.js for organization and productivity management.
- Email Template App — React.js, TypeScript, Lexical Text Editor, and Styled Components.

EDUCATION

Islamia University Peshawar | **Bachelor of Science in Computer Science** |

Paradise Children Colleges Hangu | **F.Sc. (Pre-Engineering)** |

Paradise Children Colleges Hangu | **Matriculation** |

EXTRACURRICULAR ACTIVITIES

Gaming • Reading • Travelling
